METHODOLOGY 

Indicators & Methodology

Scoring

3

Core Metrics

Forest IQ provides scores of companies in the database against the 3 core metrics:

- Metric 1: Exposure to deforestation & ecosystems conversion;
- Metric 2: Financial materiality of forest and ecosystem exposure;
- Metric 3: Performance reporting on deforestation, conversion of natural ecosystems and associated human rights abuses.

0 to 5 points

under metrics 1 & 2

0 to 10 points

under metric 3

For each core metric, display of:

- An assessment category (no to critical exposure/materiality under metrics 1 & 2, and laggard to leader under metric 3);
- A score associated;
- Date of metric/data point calculation;
- Data source and the source's publication data.

Narrative

DEFORESTATION DATA PLATFORM

An alliance of 3 leading not-for-profits (Global Canopy, ZSL & SEI) with deep expertise in data-driven approaches to combat deforestation launched in **2023**

Brings together the best available, actionable data from on how more than 2,000 major companies are addressing their links to deforestation

Data Sources

8 underlying datasets

Deforestation Action Tracker
Floresta 250 - Cattle
Forest 500
RSPO
SEI York
Trase
ZSL SPOTT
CDP

Coverage

+2000 companies

Commodities covered: palm oil, soy, beef, leather, timber, pulp & paper, natural rubber, cocoa, coffee, gold, and coal

Historisation

2023: Platform launch

Updated twice a year with new data
